

11/22/19

ROMAINE ADVISORY

Based on new information, CDC is advising that consumers not eat and retailers not sell any romaine lettuce harvested from the Salinas, California growing region.

In accordance with the recommendation from the FDA and CDC released 11/22/19, on behalf of our mutual clients, **it is required that your company immediately cease shipping/selling of any Romaine harvested in Salinas, California.**

Please see the announcement from the FDA for more information.

Any Product which is from growing regions outside of Salinas is not considered to be associated with this advisory. Product coming from regions in Arizona (ie: Yuma) and Huron California are considered to be safe to consume as of this time.

Please rest assured that Nature's Produce has stringent safety and protocol procedures/policies regarding recalls under our HACCP safety guidelines. If any product is in question, we will always immediately notify you so any issue may be handled in the safest manner to avoid any possible food borne illness. Please feel free to contact us should you have any further concerns.
